WHO WE ARE

Globe-America Consulting, Inc. is a Service-Disabled Veteran-Owned Small Business delivering CMMC readiness, NIST SP 800-171 implementation, and governance-risk-compliance advisory to the Defense Industrial Base. We serve DoD primes and their subcontractors, manufacturers handling CUI, and IT service providers operating under DFARS 252.204-7012.

WHAT MAKES US DIFFERENT

Most compliance firms hand you a gap report and leave. We stay through implementation, evidence assembly, and assessment defense — then sustain the program after certification. Compliance advisory and operational execution from the same practitioner.

CORE CAPABILITIES

CMMC Readiness

Level 1 and Level 2 gap assessment, scoping, and certification preparation.

SSP & POA&M Development

System Security Plans, remediation planning, and SPRS score defense.

GRC Advisory

Policy libraries, procedure development, and control ownership mapping.

MSSP Services

Right-sized monitoring and managed security for small DIB contractors.

NIST SP 800-171

Control implementation across technical, administrative, and physical domains.

Assessment Defense

Mock assessments, evidence packages, and C3PAO interview preparation.

Supply Chain Risk

DFARS flow-down analysis and subcontractor compliance vetting.

ISO 9001 Readiness

QMS gap assessment and internal audit by a certified Lead Auditor.

RELEVANT EXPERIENCE

U.S. Air Force — Civil Engineering & Program Management 20 Years

Two decades executing and overseeing DoD programs from inside the government: requirements development, program oversight, contractor performance management, and sustainment operations across multiple commands.

- **Relevance:** Direct experience with how DoD writes requirements, evaluates suppliers, and enforces compliance — applied on the contractor side.

CMMC Readiness Practice — Small Business DIB 2025–26

Delivered Level 1 and Level 2 readiness advisory to DoD subcontractors — FAR 52.204-21 and NIST SP 800-171 gap assessment, CUI boundary scoping, SSP review, and SPRS submission guidance — supported by a purpose-built suite of 24 browser-based tools covering all 110 controls.

- **Outcome:** Clients reach defensible SPRS positions without the scope errors and unnecessary procurement that inflate small-supplier compliance cost.

Regulatory Engagement — DoW CMMC Reform Task Force 2026

Prepared and submitted a formal Request for Information response addressing CMMC implementation burden on small and mid-size defense suppliers.

- **Outcome:** Small-business perspective entered the federal CMMC policy record.

WHY GLOBE-AMERICA

Set-Aside Eligible

SDVOSB status supports sole-source and set-aside awards under FAR 19.14.

Practitioner-Led

Every engagement run personally by a CMMC RP and 20-year USAF veteran.

Built for Small DIB

Scoped and priced for suppliers without a full-time compliance function.
